## ACCESS AND INCLUSION

This Plan is available in alternative formats upon request, including Braille, large print, electronic and audio format on CD. National Relay Service (NRS): 13 36 77  
 Translating and Interpreting Service (TIS): 13 14 50

We acknowledge and pay our respects to the traditional custodians of this land, the Whadjuk people of the Noongar nation and their Elders past and present.

# EXECUTIVE SUMMARY

The City of South Perth is committed to improving the health and wellbeing of its community. The City's first Public Health Plan is a guide to integrating a public health focus into existing services and facilities and future public health initiatives.

It reports on the current health status of the community and identifies areas where the City can make a contribution to the improvement of health outcomes for the community and visitors.

One of the key aspirations of the Public Health Plan is to partner with other organisations and institutions to improve the health and wellbeing of the community, deliver programs that address health concerns and reduce the burden of chronic disease.

Today, the leading causes of death and disability in Australia are chronic diseases such as cancer, cardiovascular disease, diabetes and mental health conditions (Australian Institute of Health and Welfare, 2018). Many of these chronic diseases have lifestyle risk factors which increase the chances of a person getting a chronic condition. Our aim through the Public Health Plan is to target these behavioural lifestyle choices such as healthy eating, physical activity, harmful tobacco and alcohol use to achieve healthier outcomes for our community.

The priority areas identified by the City are:

- Public health protection
- Chronic disease prevention and management
- Mental health.

Within each priority area there will be a corresponding suite of key actions the City will undertake over the next five years to target chronic disease risk factors and protect public health. These actions will be reviewed annually and a new Public Health Plan will be written every five years, developed from information gathered from the previous plan.

# INTRODUCTION

## WHAT IS PUBLIC HEALTH?

The State's *Public Health Act 2016* defines public health as:

- The wider health and wellbeing of the community
- The combination of safeguards, policies and programs designed to protect, maintain, promote and improve the health of individuals and their communities and to prevent and reduce the incidence of illness and disability (State Public Health Plan for Western Australia, 2019).

### Examples of what public health includes

	Safe and nutritious food
	The way our communities are designed
	Safe drinking water
	Walking trails and cycle routes
	Smoke and alcohol free environments
	Waste management

	Recreational facilities, sports grounds and parks
	Events, places and activities that bring the community together
	Health information and education programs
	Safe housing
	Maintaining high levels of immunisation
	Optimal mental health and wellbeing

The sustainable health review undertaken in 2017 by the Government of Western Australia commits to eight enduring strategies and recommendations for the future direction of public health. The first enduring strategy is a commitment to collaborate and address major public health issues. These issues were identified as halting the rise in obesity in WA, reducing harmful alcohol use, reducing inequity in health outcomes and access to care for vulnerable groups such as Aboriginal people, culturally and linguistically diverse people and people living in low socioeconomic conditions.

# SOCIAL DETERMINANTS OF HEALTH

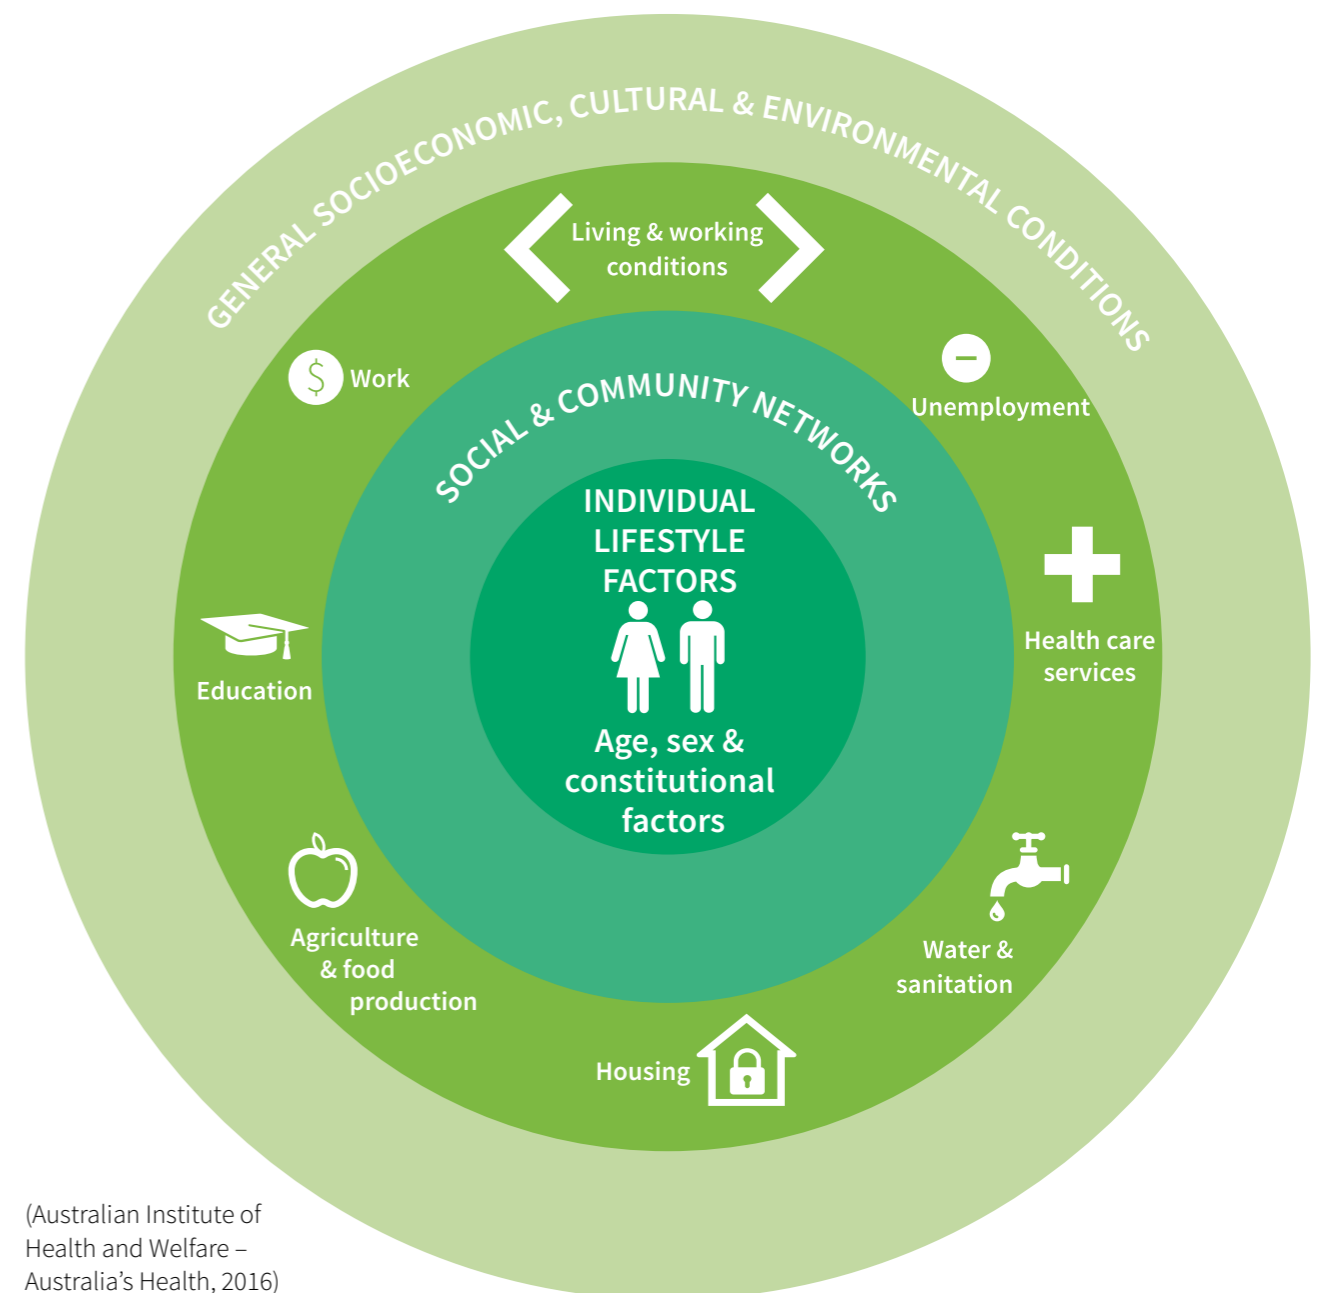

“The conditions in which a person is born, grows up, lives, works and ages and in turn influences their opportunity to be healthy, their risk of illness and life expectancy.”

(World Health Organisation, 2017)

The City recognises that the social determinants of health contribute to a person’s health and wellbeing. The World Health Organisation defines social determinants as “the conditions in which a person is born, grows up, lives, works and ages and in turn influences their opportunity to be healthy, their risk of illness and life expectancy” (World Health Organisation, 2017). The City acknowledges that health outcomes are complex and are determined by a number of factors including social, economic, cultural and environmental factors which must be taken into account when considering planning for public health.

The Public Health Plan is a broad community-wide plan which endeavours to work towards better health outcomes for the City. However it is acknowledged that a number of risk factors can contribute to poorer health outcomes. Low financial security, unemployment and homelessness can lead to decreased health status. Similarly those living with a disability and minority groups may also encounter barriers to achieving good health. The City engages in a number of ways to address some of these factors, such as service delivery through our senior citizen centres and libraries and in partnerships with local groups and clubs.

(Australian Institute of Health and Welfare – Australia’s Health, 2016)

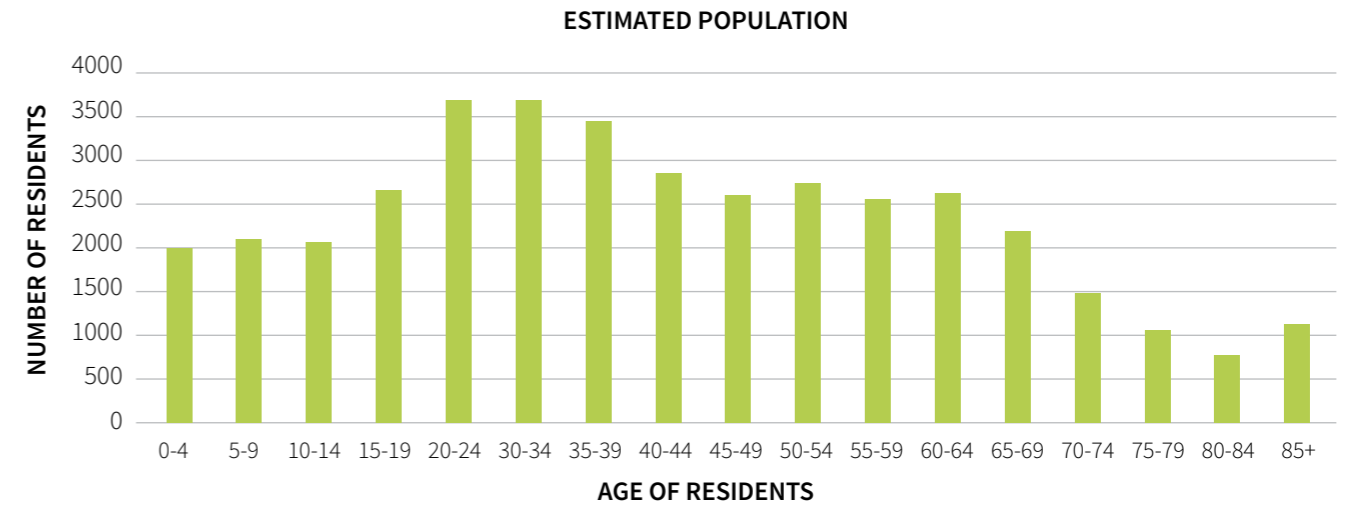

# OUR COMMUNITY

Population density: 21.97 people per hectare

The City of South Perth Local Government Area covers an area of 20 square kilometres. In 2016 the City's total population was 41,985 (Australian Bureau of Statistics, 2016). Aboriginal people accounted for 1.3 per cent of the population and 22 per cent were from non-English speaking backgrounds.

COMMUNITY SNAPSHOT		
<b>36%</b> were born overseas	<b>22%</b> from non-English speaking backgrounds	<b>35%</b> residents renting
<b>1.3%</b> (532) Aboriginal population	<b>37</b> median age	<b>92.8%</b> are employed

Top five languages spoken at home other than English are Mandarin, Cantonese, Indonesian, Italian, Persian/Dali. Top five countries of birth (non-English speaking) are Malaysia, China, India, Indonesia and Singapore

# OUR HEALTH STATUS

**91.7%**

Of residents do not eat the recommended five serves a day

**53%**

Over half of our residents are overweight or obese

Nearly **20%** of residents have high cholesterol

One third of residents eat fast food at least weekly

**49%**

Of residents eat less than two serves of fruit daily

**Physical activity** Over a third of residents over 18 do less than 150 minutes of physical activity per week. 28.9% spend 21 or more hours per week in sedentary leisure time e.g. watching television or using computers.

**Alcohol use** 26.6% of residents drink at high risk levels for long-term harm (more than two standard drinks on any one day) while just over 10% drink at high risk levels for short-term harm (more than four drinks per day).

**Mental Health** 15.1% of the community have been diagnosed by a doctor with a stress related problem, depression, anxiety or other mental health problem in the last 12 months.

Today the leading causes of death and disability in Australia are chronic diseases such as cancer, cardiovascular disease, diabetes and mental health conditions (Australian Institute of Health and Welfare, 2018).

A range of risk factors increase the likelihood of a person developing chronic diseases (Australian Institute of Health and Welfare, 2016). These factors include:

- Lifestyle or behavioural risk factors
- Biomedical risk factors
- Non-modifiable risk factors such as age, sex and genetics
- Social and economic determinants
- Physical environment determinants (City of South Perth Health and Wellbeing Profile, 2019).

Chronic disease	BEHAVIOURAL RISKS				BIOMEDICAL RISKS		
	Tobacco smoking	Insufficient physical activity	Alcohol	Dietary risks	Excess body weight	High blood pressure	Abnormal cholesterol
Coronary heart disease	x	x	-	X	x	x	X
Stroke	x	x	x	-	x	x	X
Type 2 diabetes	x	x	-	X	x	-	-
Colorectal cancer	x	-	x	X	x	-	-
Oral health	x	-	x	X	-	-	-
Breast cancer	-	-	x	-	x	-	-
Lung cancer	x	-	-	-	-	-	-
COPD	x	-	-	-	-	-	-

Table 1: Associations between chronic diseases and risk factors

The City of South Perth Community Health Profile, 2019 was developed by the East Metropolitan Health Service (EMHS). This profile gives an overall picture of health of the community, by combining all available population health data from a variety of sources relating to lifestyle and biomedical risk factors, social and economic determinants of health, along with current health conditions, death, immunisation and early childhood development (EMHS, 2019).

## Top five causes of death in males in the City of South Perth 2011-2015

CONDITION	CITY OF SOUTH PERTH		WA
	Estimated population	All cases (%)	All cases (%)
Ischaemic heart diseases	104	14.5	14.3
Dementia (including Alzheimer's disease)	79	11.0	4.7
Cerebrovascular diseases	39	5.5	4.5
Lung cancer	35	4.9	6.5
Chronic obstructive pulmonary disease (COPD)	28	3.9	4.1

## Top five causes of death in females in the City of South Perth 2011-2015

CONDITION	CITY OF SOUTH PERTH		WA
	Estimated population	All cases (%)	All cases (%)
Dementia (including Alzheimer's disease)	194	20.1	10.2
Ischaemic heart diseases	117	12.1	12.0
Cerebrovascular diseases	76	7.9	7.6
Breast cancer	38	3.9	4.1
Accidental falls	33	3.4	1.9

# ABORIGINAL HEALTH

In 2016 there were 532 Aboriginal people within the City of South Perth. This made up 1.3 per cent of the population (Australian Bureau of Statistics, 2016). A breakdown of health data for Aboriginal people is not available for the City due to the small sample size (East Metropolitan Health Service (EMHS), 2019).

The City consults with the Aboriginal Reference Group (ARG) on a regular basis and for Aboriginal health matters liaises with Moorditj Keila and the EMHS. Both of these services provide Aboriginal healthy lifestyle programs in the City under the EMHS Aboriginal Health Strategy. Moorditj Keila runs Aboriginal health programs from the Manning Community Centre.

# PUBLIC HEALTH IN LOCAL GOVERNMENT

Local governments have a long history of public health protection to provide, organise and maintain basic public health services such as waste, sewerage, pollution and compliance with local laws such as animal control and nuisances. Changing community expectations and improved understanding about health and its determinants has reinforced the unique position of local governments to influence health.

## INFECTIOUS DISEASES

The City has a responsibility for public health protection and to minimise the risk of disease transmission. During times of an epidemic or pandemic the City abides by state and federal government health directions. The City will take a leadership role, coordinating the social and economic response and recovery activities. The City will also endeavour to keep the community informed with up to date health information issued by relevant health authorities.

In line with the West Australian Government Pandemic Plan and the State Hazard Plan for Human Biosecurity the City will (if required) in the event of an epidemic or pandemic:

- Provide Environmental Health Officers to Metropolitan and Regional Human Epidemic Coordination Centres, as required
- Assist with the investigation of human epidemics
- Assist with monitoring of food safety
- Assist with the safe disposal of contaminated waste
- Assist with the control of vermin or insect infestations, including reservoir elimination programs
- Provide support with other local resources as requested by the State Human Epidemic Controller or local, state, metropolitan or regional Human Epidemic Control Centres.

## PUBLIC HEALTH ACT 2016

The *Public Health Act 2016* was introduced in 2016 to repeal much of the outdated health legislation within *Health Act 1911*. The key features of the *Public Health Act 2016* include:

- Promoting public health and wellbeing in the community
- Helping to prevent disease
- Injury, disability and premature death
- Encouraging individuals and communities to plan for, create and maintain healthy environments
- Collecting relevant health data to further research health risks.

One of the legislative obligations for local governments under the new Act is the development of a local Public Health Plan.

The City's Public Health Plan is a five year plan which provides a framework of the City's commitment to improve the health and wellbeing of its community. The Plan is developed with health data supplied by the East Metropolitan Health Service, the priorities of the State Public Health Plan and community engagement.

## STRATEGIC DIRECTION

The City's Strategic Community Plan 2020-2030 (SCP) outlines the community's aspirations and priorities for the City of South Perth. The overarching vision for the City is of active places and beautiful spaces with a connected community, accessible and vibrant neighbourhoods and a unique, sustainable natural environment.

The SCP recognises the importance of effective working partnerships with government agencies, non-government organisations, businesses and the community as critical to its success. This approach has been reflected in the Public Health Plan and the City will take an active role in pursuing partnerships and collaborating with other organisations across the key action areas to promote and improve the health and wellbeing of the City.

The SCP seeks to 'encourage and educate the community to embrace sustainable and healthy lifestyles'. Several of the key actions outlined in the implementation plan seek to facilitate healthy lifestyles and play an important role in enhanced community participation and engagement. Connected communities can contribute to improved health outcomes for individuals and the overall health of the community.

Community infrastructure is essential to health. As part of the SCP the City is committed to maintaining properties, assets and facilities and developing community infrastructure to respond to changing community needs and priorities. One of the priorities of the Public Health Plan is the ongoing maintenance of parks, walking routes, sports ovals, leisure facilities and implementation of the Joint Bike Plan.

### PLANNING FOR THE FUTURE

Part of the City's vision for the future, as articulated in the SCP, includes planning for a new Recreation and Aquatic Facility (RAF) with an explicit focus on improving health outcomes through preventative health activities. The proposed RAF will provide an integrated model of health and deliver a range of exercise and wellness programs. In addition the RAF will include a wide range of sporting and recreational activities such as swimming, golf and playing courts. The City is actively developing partnerships with key stakeholders to deliver this objective.

The City will seek to establish a Public Health Reference Group to provide advice on implementation of the Public Health Plan and emerging public health issues. Membership will be drawn from community groups, health professionals and interested community members.

# COMMUNITY ENGAGEMENT

The Public Health Plan has been developed and informed by data from State Government and feedback gathered from the community during the engagement period held between November and December 2019. The community was invited to give their feedback on areas identified as public health priorities in the State Plan and community health profile data to determine perceived areas of concern. Secondly the community was asked to rank the importance of what services/infrastructure the City offered in relation to maintaining public health. Lastly the community was invited to share their most significant public health concerns.

From the responses gathered the community rated the following:

# OUR PRIORITIES

To improve and enhance the health and wellbeing of the community, through the Public Health Plan the City has adopted three priority areas. These are a reflection of the health status of our community, issues raised during the community engagement process and the State Public Health Plan.

### 1. Public health protection

The City plays an important role in public health protection, managing risks relating to food safety, vector management and health related complaints.

### 2. Chronic disease prevention and management

Recognising the burden that chronic diseases place on the wellbeing of our community, the City will deliver and where appropriate partner with other organisations to deliver a range of initiatives to address identified risk factors such as obesity, poor nutrition, alcohol and tobacco use.

### 3. Mental health

The City will help raise awareness of mental health issues through partnering with organisations such as Act Belong Commit to provide opportunities for individuals to be mentally, physically, spiritually and socially active in the community.

The action areas for each of the key priorities are shown in Appendix 1 – our priorities.

For each action, the City's level of involvement (and potential involvement) has been listed using the following categories:

# APPENDIX 1: OUR PRIORITIES

## RESOURCING

Public health planning is a key responsibility of local government and is met by existing resourcing. The intention of public health planning is to require local government to assess and ensure their resources are used in the most appropriate and efficient way to address the public health needs of the local population, rather than increase the number of services provided. One of the objectives of the Public Health Plan is to partner and collaborate with other organisations and institutions to improve health outcomes for the City.

## EVALUATION

Implementation of the Public Health Plan will be reviewed annually by the City. Input will be sought from responsible business units, the Public Health Reference Group and Council with revisions made where necessary. An annual report on implementation will be provided to Council and made publicly available.

In 2024 the City will undertake an extensive consultation and review process to assist with the development of the next Public Health Plan.

### PRIORITY AREA 1 – PUBLIC HEALTH PROTECTION

	KEY ACTIONS	KEY OUTCOMES	ROLE OF CITY	RESPONSIBLE SERVICE UNIT	2020/21	2021/22	2022/23	2023/24
<b>1.1 FOOD SAFETY</b>								
1.1.1	Undertake food safety inspections of all registered food businesses under the <i>Food Act 2008</i>	<ul style="list-style-type: none"> <li>All food businesses inspected for food safety</li> <li>Numbers of premises registered and inspected on risk basis</li> <li>Issuing of notices, Infringements and legal action for non-compliances</li> </ul>	Provider	Environmental Health	✓	✓	✓	✓
1.1.2	Promote the availability of free food safety training for registered food businesses in the City	<ul style="list-style-type: none"> <li>Number of food handlers trained in the City</li> </ul>	Provider	Environmental Health	✓	✓	✓	✓
