

Stormwater Drainage for Proposed Buildings

Form 4

STORMWATER RE-USE: CERTIFIED ENGINEER'S STATEMENT

I, (in capital letters)....., being a Chartered Practicing Engineer of the Institute of Engineers Australia, hereby certify that the hydraulic plan attached for the development at the following address.....has been checked and meets the criteria in the following documents:

- Standard Conditions of Approval for Private Drainage Connections
- Standard Conditions of Approval for Soakwells
- Standard Conditions of Approval for Stormwater Re-Use
- Policy P354 Stormwater Drainage Requirements for Proposed Buildings
- Stormwater Drainage Precinct Requirements
- Australian Rainfall and Runoff, Edition 1997 or 2019

IMPORTANT NOTE:

Obtaining an approval from Infrastructure Assets & Design for a stormwater drainage system is NOT an authorisation to commence building construction. A BUILDING LICENCE MUST BE OBTAINED from the City's Building Services Department prior to commencing any work of a structural nature in relation to the proposed building.
