

CITY OF SOUTH PERTH
**Significant
Tree Register**

A CITY OF ACTIVE PLACES AND BEAUTIFUL SPACES

MORE INFORMATION ABOUT THE SIGNIFICANT TREE REGISTER

BACKGROUND

The City of South Perth values its urban forest as it plays a key role in determining a suburb's identity. Encompassing more than 320 hectares on private and public land, the urban forest includes all vegetation in streets, private gardens, public parklands, and public institutions.

In 2018, to further support retention of vegetation and counter its progressive loss within its wards, the City adopted Policy P350.05 Trees on Development Sites and Street Verges. The City also recognises and protects vegetation of local significance through its Register of Tree Preservation Orders under Town Planning Scheme 6 (TPS 6).

WHAT IS A TREE PRESERVATION ORDER?

Under TPS 6 the City may include an individual tree, a group of trees, or other forms of vegetation on its Register of Tree Preservation Orders. These provisions will carry over to the City's draft Local Planning Scheme No 7 and once gazetted will be referred to as the Significant Tree Register.

If the City considers there is a risk of imminent damage to or destruction of significant vegetation, an emergency Tree Preservation Order may be issued without the property owner's immediate agreement. The owner will subsequently be notified of the Order in writing and their comment sought at the earliest available opportunity.

QUALITIES FOR NOMINATION

Vegetation may be nominated for inclusion on the Register directly by the City or by any member of the public. If vegetation is nominated by someone other than the owner of the property on which the vegetation is located, the City will liaise with the property owner and seek their comment prior to its inclusion on the Register.

All nominations for inclusion on the Register will be assessed by City officers using established criteria, including aesthetic quality, historical significance, and environmental attributes. Other characteristics to be assessed include:

- specimens of great age
- remnant native species
- an outstanding example of a particular species
- prevalence/rarity of the species.

WHAT DOES INCLUSION ON THE SIGNIFICANT TREE REGISTER MEAN?

The addition of vegetation to the Register is acknowledgement of an individual specimen's significance and affords the City an extra layer of legislative protection.

The City requires written consent before any vegetation included on the Register can be cut, pruned, lopped, modified, removed, or destroyed. To facilitate evaluation of a request to undertake work on registered significant vegetation, the City requires the following:

- Written request to the City specifying the work proposed, detailing how and by whom it is to be carried out, associated timeframes, and the reason for the work
- Requests to complete work on vegetation located on private land requires verification from the owner of the land upon which the vegetation is situated
- The City may consider it necessary for an arborist/tree surgeon or person with acceptable experience to provide a report verifying the necessity of the proposed work. This requirement will be assessed on a case-by-case basis.

The City may agree to the work proposed, with or without conditions, or refuse work. Failure to gain consent prior to any work on registered vegetation is an offence under TPS 6.

CAN VEGETATION BE REMOVED FROM THE REGISTER OF TREE PRESERVATION ORDERS?

The City may amend or repeal a Tree Preservation Order. A request to amend or repeal will need to be in writing and include information supporting the application. The City will consider the request and provide a written response.

Trees on Private Property

Many areas in the City of South Perth are experiencing a significant loss of trees on private properties, reducing the overall tree canopy cover. It is critical that these trees are preserved wherever possible.

Preserve an existing tree - Significant Tree Register

To preserve a tree on private property, the property owner may wish to register the tree on the City's Significant Tree Register.

A tree or group of trees may hold significant value for their visual, aesthetic, botanic, scientific, ecological, historical, commemorative, cultural or social aspects.

A tree or trees nominated for listing must meet one or more of these criteria as well as an analysis of health to be considered for listing.

If a tree is nominated by someone other than the owner of the property on which it is situated, written consent from the owner must be obtained.

Trees of Special Significance can not be removed, pruned or maintained in any way without written permission from the City.

All the Significant Trees in the City are identified with a purple dot on Intramaps.
