

Additional Information

I am passionate about the wellbeing of our community and am standing to protect and enhance services, facilities, and outdoor spaces that are part of the fabric of South Perth.

COMMUNITY LIBRARIES

Local libraries are one of our most important community spaces, and I was very disappointed when opening hours were cutback by our City last year. Our local library is now only open for 4 hours on weekends, and it is no longer open on any evening. Affordable access to books, programs, resources, and safe study spaces are important to local families and residents.

ENVIRONMENT

South Perth is iconically beautiful and the City plays a crucial role in caring for our waterways, unique flora and fauna, and our overall environment. It makes good sense to introduce the Waterwise Verge Rebate implemented by other Councils to beautify streets, conserve water, and reduce verge maintenance costs.

SUSTAINABILITY

Our Waste Transfer and Recycling Centre helps keep our City clean and gives our community the opportunity to develop a sustainable circular economy. It is time for these services to be returned to pre-pandemic operating hours.

GOOD GOVERNANCE

Good governance is essential to sound decision-making. Our shared community resources must be used responsibly to serve local residents and businesses and enable us to plan sensibly for the future. Respectful conduct, transparency, timeliness, and good financial management all matter.

LOCAL KNOWLEDGE

My experience includes specialising in corporate governance as a partner of a major Australian law firm, owning and managing one of Australia's leading documentary production companies, and undertaking pro bono work for charities including The Smith Family and Ear Science Institute Australia.

If you are a voter or belong to one of our many wonderful sporting, cultural, school, faith, environmental, charity or business groups, I would love to hear what services, facilities, and spaces matter to you and what your hopes are for our community
