1. Protect Property Rights - Property owners should have the right to plant trees, prune trees, or remove trees that are on their own properties **without these activities being classified as developments** requiring Council approval.

I will fight for the rights of owners to make their own decisions regarding their own properties without the threat of legal action.

2. Reactivate Sir James Mitchell Park - The park was originally designed to be used by local residents for sport and active recreation. It needs extensive drainage so it can be enjoyed 12 months of the year for this purpose. Funding for the improvements to be sought from the State and Federal Governments.

3. Encourage collegiality amongst councillors.

4. Reduce division amongst residents by recommending that no additional trees be planted on the foreshore that will potentially obstruct views.
