

### **Additional Information**

I wish to achieve for the community pragmatic and positive outcomes such as:

Advocate for the State Government to locate their regional indoor multi-use sport facility within South Perth. However, noting the lessons learnt from the cancelled Recreational Aquatic Facility (RAF), prudence would require Council to develop a Plan B for a local facility to replace the South Perth George Burnett Leisure Centre.

The City's annual budget and long-term financial plan go hand in hand. I will always advocate that financial forecasts for revenue and spending are achievable to ensure your annual rates are reasonable with no surprises.

Enhance and future-proof our neighbourhoods with water-wise parklands and increased tree canopy to ensure where we live remains the leafy, nature friendly and inviting suburbs we currently enjoy.

Continue with the City's initiatives to fight crime and reduce anti-social behaviour via the security rebate program, use of CCTV trailers in hot spots, community education, and engagement with State Government and community stakeholders.

As with other parklands, an area of Coolidge Street Reserve is now deserving of being water reticulated to provide an all year-round grassed area for its users.

Ensure that our local sporting, volunteer and recreational community groups receive the funding and support they deserve to continue what they do best - provide a community service

The use of contemporary asset management to service City infrastructure. This is one of the best methods to achieve long-term value for money for the ratepayer, whilst ensuring City infrastructure still functions, the environment protected and public safety ensured

Advocate that a future large scale medium to high density residential and mixed development planned by the State Government for the Curtin-Bentley (Baron-Hay Ct, George St, Hayman Rd) area is responsive to local residents and the adjacent Jirdarup Bushland Reserve

No drama. Just good government serving the community
