

Additional Information

Planning and development require particular attention given the Activity Centres at Canning Bridge and Preston St. I'll ensure due regard is given to all planning matters. Local residents must be heard. The impact of traffic congestion and parking limitations is significant and needs addressing. The City's parking strategy must be updated to include a detailed plan for the Canning Bridge area and Preston St surrounds. Local businesses will also benefit from a clear parking strategy.

Construction and Traffic Management Plans must be complied with during development to minimise impact on locals. I'll work with the City to increase compliance.

We deserve our own indoor multi-use courts and I'll work with the City to start planning them. This is at the top of the City's Advocacy Strategy & Priority list.

I'll ensure Challenger Reserve upgrades progress - these are long overdue and we need to get on with it.

Como Ward has no static CCTV cameras aside from the Civic Centre/Library - I'll work with residents and the City to establish requirements/funding and improve lighting along park footpaths to enhance community safety.

The Urban Greening Implementation Plan will be finalised later this year - I'll engage with residents on this and support the City's efforts. We owe it to future generations and our wildlife.

Prudent use of ratepayer funds is essential to establish and maintain community trust - I offer informed, transparent decisions with no spin.

Let's work collaboratively, and together we can make Como Ward an even better place to live, work and play.
