

### **Additional Information**

#### **Strong Governance**

I am fully committed to ensuring that any findings from the independent psycho-social review and recommendations from the Local Government Inspector are taken seriously. I will work to ensure appropriate action is taken in a timely way address issues identified. Addressing this issue means the council and administration can refocus on delivering value for rates collected in our community.

#### **Community Safety**

I will advocate to strengthen partnerships and collaboration between the City of South Perth, relevant State Departments, the WA Police Force, and our local Community Leaders. We can ensure we are doing everything possible, so everyone feels safe in our neighbourhoods. Where data and community feedback show that improved street lighting and targeted CCTV upgrades will make a tangible difference, let's action it.

#### **Renewing Our Community Assets**

Our city must continue to press on with upgrading its shared infrastructure. In particular, upgrades to Challenger Reserve are long overdue.

#### **Protecting Public Open Space & the Environment**

We have many wonderful public open spaces which are precious natural assets. I will fight to protect them as accessible, preserved open spaces for our whole community to enjoy. We need to ensure the City's Urban Greening Strategy is continued to be supported and brought to life by the administration. I will champion its implementation throughout our public spaces to enhance our local tree canopy and support biodiversity.
